### Scientific qualifications: Area of Research and Publication

**Current research** is within Construction Management and Industrialized Building, addressing Clients and Supplier-Led Innovations. Main focus is on the role of the Construction Client in Industrialized Building and clients receptiveness of, and impact on, supplier-led innovation. **Ph.D. Thesis:** "Managing Information to Unblock Supplier-Led Innovation in Construction: Barriers to Client Decision-Making on Industrialized Building in Sweden". **Publications:** <http://www.ltu.se/staff/s/susanne>

### Educational qualifications: Areas and Teaching Contribution

My teaching experience includes more than 10 000hrs of teaching and teaching-related activities, course development, course supervision and teaching in more than 25 courses, mainly within Industrial Management, Industrial Marketing and Structural and Construction Engineering. I have also supervised and coached 18 undergraduate students in their thesis work.
