General syllabus for doctoral (third-cycle) studies in Applied Geochemistry at Luleå University of Technology

Decided by the Chair of the Board of Faculty of Science and Technology 22 October 2020.

1. Subject description

Swedish name: Tillämpad geokemi

English name: Applied Geochemistry

Applied Geochemistry is concerned with studies into the occurrence and mobility of the elements in rocks, soil, and water, focusing on methods to prevent or reduce the environmental impact of metal extraction and infrastructure development.

2. Programme aim and intended learning outcome

The aim of the doctoral (third-cycle) studies in Applied Geochemistry at the University is to give the doctoral student specialised knowledge in Applied Geochemistry, in-depth knowledge of different research methods and a good understanding of the challenges related to research and its practical application. The overall objective of the programme is that the doctoral student develops into a critical and autonomous researcher in Applied Geochemistry, able to plan and carry out research projects. The doctoral student shall fulfil all the qualitative targets specified in the Higher Education Ordinance as well as in the locally decided qualitative targets, if any (see attached Annex A).

3. Admission requirements and selection

3.1 General entry requirements

An applicant meets the general entry requirements for doctoral (third-cycle) studies if he or she has been awarded a Master's (second-cycle) qualification, has satisfied the requirements for courses comprising at least 240 credits, of which at least 60 second-cycle credits, or has acquired substantially equivalent knowledge in another way, in Sweden or elsewhere (Higher Education Ordinance (2010:1064) Chapter 7 Section 39).

3.2 Specific entry requirements

A person is qualified for admission to doctoral (third-cycle) studies in Applied Geochemistry if he or she meets the general entry requirements and has as main subject Geosciences, Natural Resources Engineering, Chemistry or Chemical Engineering.

For each subject in which doctoral (third-cycle) courses and study programmes are offered, a general study syllabus is required (Higher Education Ordinance (2010:1064) Chapter 6 Section 26). The general study syllabus must include the details specified in this template. The admission of a doctoral student presupposes that the Chair of the relevant Faculty Board has adopted a general study syllabus for the doctoral (third-cycle) subject area. The relevant Head of Department is responsible for proposing a general study syllabus to the Chair of the relevant Faculty Board in accordance with the established template. Text in italics describes how to complete the template and should thereafter be deleted.

Template decided by the Chair of the Board of the Faculty of Humanities and Social Sciences/the Chair of the Board of Faculty of Science and Technology, 14 January 2020, reg. no. LTU-5818-19

An applicant also meets the specific entry requirements if he or she has acquired substantially equivalent knowledge in another way, in Sweden or elsewhere.

3.3 Selection

In selecting among applicants who meet the requirements, their ability to benefit from the course or the study programme shall be taken into account. However, the fact that an applicant may be credited for previous courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants (Higher Education Ordinance (2010:1064) Chapter 7 Section 41). The University's local guidelines in the Admissions procedure for doctoral (third-cycle) studies must also be applied.

The following criteria will be used in the selection of applicants for doctoral (third-cycle) studies in Applied Geochemistry:

- Assessment of the applicant's ability to benefit from third-cycle courses and study programmes in the research subject in accordance with criteria methodical cogency, theoretical awareness, critical thinking capacity, autonomy, originality, and communicative skills.
- Previous studies and knowledge,
- Specific knowledge in Natural Resources Engineering, Geosciences (Geochemistry in particular), and Chemistry and Chemical Engineering.
- Good skills in oral and written communication in Swedish and/or English.

4. The degree

The doctoral (third-cycle) studies lead to a Degree of Doctor. In Applied Geochemistry, a student admitted to doctoral studies has the right to be awarded a licentiate degree after having completed at least 120 credits of the programme leading to a Degree of Doctor.

4.1 Degree requirements

For a Degree of Doctor, the doctoral student shall

- have been awarded a pass grade for courses of at least 60 credits
- have been awarded a pass grade for a research thesis (doctoral thesis) of at least 180 credits.

The thesis and the courses shall together amount to 240 credits for a Degree of Doctor.

For a Degree of Licentiate, the doctoral student shall

- have been awarded a pass grade for courses of at least 30 credits.
- have been awarded a pass grade for a licentiate thesis of at least 90 credits.

The thesis and the courses shall together amount to 120 credits for a Degree of Licentiate,
För licentiatexamen krävs

For each subject in which doctoral (third-cycle) courses and study programmes are offered, a general study syllabus is required (Higher Education Ordinance (2010:1064) Chapter 6 Section 26). The general study syllabus must include the details specified in this template. The admission of a doctoral student presupposes that the Chair of the relevant Faculty Board has adopted a general study syllabus for the doctoral (third-cycle) subject area. The relevant Head of Department is responsible for proposing a general study syllabus to the Chair of the relevant Faculty Board in accordance with the established template. Text in italics describes how to complete the template and should thereafter be deleted.

Template decided by the Chair of the Board of the Faculty of Humanities and Social Sciences/the Chair of the Board of Faculty of Science and Technology, 14 January 2020, reg. no. LTU-5818-19

4.2 Titles of degree

- After the completion of the Degree of Doctor in Applied Geochemistry, the doctoral student is awarded the title Doctor of Philosophy in Science.
- After the completion of the Degree of Licentiate in Applied Geochemistry, the doctoral student is awarded the title Licentiate of Science.

A request of a title of degree other than the stipulated may be submitted in accordance with laid down guidelines.

5. Programme structure and implementation

5.1 Programme scope and structure

The doctoral (third-cycle) programme includes two blocs; courses and thesis work. The programme comprises four years (two years for the licentiate degree). In case the doctoral student has a doctoral studentship and carries out departmental duties to a certain extent (no more than 20% of the whole programme), a corresponding prolonged period may be approved.

5.2 Individual study plan and supervision

An individual study plan outlining the implementation of the studies is drawn up for each doctoral student. The plan is established in consultation with the supervisor and is decided by the Head of Department by delegation of the Vice-Chancellor. The plan is reviewed and revised at least once a year.

The Head of Department shall appoint at least two supervisors, one of whom is appointed principal supervisor, for each doctoral student. The person appointed principal supervisor shall have at least qualifications required for appointment as a docent and be employed by the University. A principal supervisor who no longer meets the job requirements may continue as supervisor until the doctoral student completes his or her studies, by an individual agreement with the relevant department. The doctoral student is entitled to supervision during the studies, unless the Vice-Chancellor has decided otherwise in accordance with the Higher Education Ordinance (2010:1064) Chapter 6 Section 30. A doctoral student who so requests may have another supervisor (Higher Education Ordinance (2010:1064) Chapter 6 Section 28). The request does not need a justification.

5.3 Courses

The individual study plan shall specify the courses to be included in the doctoral student's education. The goal attainment is examined according to the examination procedure specified in the course syllabus. Credits may be transferred in accordance with the local guidelines in the Admissions procedure for doctoral (third-cycle) studies. Courses in the categories listed below shall be included in the study plan. The distribution between the different categories may vary depending on the background of the doctoral student and is determined by the supervisors and the doctoral student together. However, a minimum of 25 credits in Geosciences with focus on Geochemistry is required for a Degree of Doctor, and 15 credits for a Degree of Licentiate.

For each subject in which doctoral (third-cycle) courses and study programmes are offered, a general study syllabus is required (Higher Education Ordinance (2010:1064) Chapter 6 Section 26). The general study syllabus must include the details specified in this template. The admission of a doctoral student presupposes that the Chair of the relevant Faculty Board has adopted a general study syllabus for the doctoral (third-cycle) subject area. The relevant Head of Department is responsible for proposing a general study syllabus to the Chair of the relevant Faculty Board in accordance with the established template. Text in italics describes how to complete the template and should thereafter be deleted.

Template decided by the Chair of the Board of the Faculty of Humanities and Social Sciences/the Chair of the Board of Faculty of Science and Technology, 14 January 2020, reg. no. LTU-5818-19

1. Courses in Geochemistry and other relevant Geoscience courses.
2. Courses in relevant topics such as Chemistry, Chemical Engineering, Mineral Processing, and Process Metallurgy.
3. Generic courses such as Research Methodology, Mathematics, Statistics, Theory of Science, Information Retrieval and Pedagogy.

It is mandatory that the research students shall obtain a good knowledge in gender equality.

5.4 Thesis

The thesis may take the form of either a single coherent work (a monographic thesis) or a compilation comprising a number of scientific articles interrelated by an introductory summary chapter (a compilation thesis). A thesis consisting of a compilation of articles is the normal case in Applied Geochemistry. Quality and scope requirements for the research activities do not differ between the two alternatives. The scientific articles or, as appropriate, the monograph must be of such quality that they meet reasonable requirements for publication in a peer-reviewed scientific forum.

The number of articles may vary depending on the doctoral student's own contribution to the different articles as well as on the size and scientific contribution of the articles. A normal doctoral thesis in Applied Geochemistry is a compilation comprising 4-5 scientific articles of which at least 2 shall be accepted for publication in international scientific journals.

A licentiate thesis in Applied Geochemistry normally contains two scientific articles of which at least one is submitted for publication in an international scientific journal.

The introductory summary chapter shall include a separate section describing the doctoral student's contribution to the articles.

The doctoral thesis shall be defended at a public defence seminar. The grades for the thesis are either 'pass' or 'failed'. When grading the thesis, the content and the defence of thesis shall be taken into account. The grade of a doctoral thesis is decided by an examining committee, appointed anew for each thesis.

A doctoral student wanting to be awarded a Degree of Licentiate shall, after consultation with his or her supervisor, request approval from the responsible Head of Department. The doctoral student defends his or her licentiate thesis at a licentiate seminar after which the thesis is graded 'pass' or 'failed'. When grading the thesis, the content and the defence of the thesis is taken into account. An examiner, appointed by the Head of Department, grades the licentiate thesis.

6. Entry into effect and interim regulations

The previous general syllabus will cease to apply for third-cycle students who are admitted to studies at third-cycle level after 2020-10-22.

For each subject in which doctoral (third-cycle) courses and study programmes are offered, a general study syllabus is required (Higher Education Ordinance (2010:1064) Chapter 6 Section 26). The general study syllabus must include the details specified in this template. The admission of a doctoral student presupposes that the Chair of the relevant Faculty Board has adopted a general study syllabus for the doctoral (third-cycle) subject area. The relevant Head of Department is responsible for proposing a general study syllabus to the Chair of the relevant Faculty Board in accordance with the established template. Text in italics describes how to complete the template and should thereafter be deleted.

Template decided by the Chair of the Board of the Faculty of Humanities and Social Sciences/the Chair of the Board of Faculty of Science and Technology, 14 January 2020, reg. no. LTU-5818-19

If agreed between the third-cycle student and the supervisors, the new general syllabus, dnr 3590-2020, may be used as a steering document for a previously admitted third-cycle student.

It must be documented in the third-cycle student's individual study plan which general syllabus that applies.

For each subject in which doctoral (third-cycle) courses and study programmes are offered, a general study syllabus is required (Higher Education Ordinance (2010:1064) Chapter 6 Section 26). The general study syllabus must include the details specified in this template. The admission of a doctoral student presupposes that the Chair of the relevant Faculty Board has adopted a general study syllabus for the doctoral (third-cycle) subject area. The relevant Head of Department is responsible for proposing a general study syllabus to the Chair of the relevant Faculty Board in accordance with the established template. Text in italics describes how to complete the template and should thereafter be deleted.

Template decided by the Chair of the Board of the Faculty of Humanities and Social Sciences/the Chair of the Board of Faculty of Science and Technology, 14 January 2020, reg. no. LTU-5818-19
