

IDAEA-CSIC-LTU

Workshop

Biogeochemistry of Sub Marine Tailings Disposal

28th of November

Luleå University of Technology, F1033

REGISTRATION - the workshop is free of charge.

We are happy to invite you to a workshop in Biogeochemistry of Sub Marine Tailings Disposal, in coordination with the WELCAMP workshop.

Register with name, contact details and special diet/allergies through [this link](#) before the 15th of November.

PROGRAM COMMITTEE 2017

Bernhard Dold, Applied Geochemistry, LTU

Jordi Cama, Institute of Environmental Assessment
and Water Research, Barcelona

LULEÅ
UNIVERSITY
OF TECHNOLOGY

PROGRAM

- 9:00 -9:30 Bernhard Dold *“Submarine Tailings Disposal (STD) – An Overview”*
- 9:30 – 10:00 Jordi Cama (PhD) *“The role of the mineral dissolution and precipitation kinetics in the STD context”*
- 10:00-10:30 Jordi Palau (PhD)
“Use of stable isotope analysis to elucidate the origin and fate of common groundwater contaminants”
- 10.30-11.00 Coffee Brake**
- 11:00 – 11:30 Robert Benaiges (MsC)
“Miner Microbes: microbial ecology associated to mining activities”
- 11:30 – 12:00 Francesco G. Offeddu (PhD)
“Shore tailings disposal, the case of the Portmán bay (Spain)”
